**Precision o-ring plumbing connections  
make installation quick and easy.  
No tools are required.**

## Advantages include:

**Architecturally compatible** | The SOL 27 Premium is available in both vertical (SOL 27 Premium S) and horizontal (SOL 27 Premium W) configurations to accommodate a variety of architectural and engineering needs. Its low 3" profile makes it visually less obtrusive.

**A lasting and reliable investment in energy savings** | The SOL 27 Premium is a highly efficient solar thermal collector. The net absorber surface of over 25 square feet helps result in a maximum output of 31,300 btu/day per panel (SRCC clear day rating). The SOL 27 Premium also offers features such as a highly selective absorber coating, low-iron, tempered solar glazing, and very effective insulation

around the absorber plate. The internal fluid tubes are copper and the absorber plate is aluminum.

**A highly effective design** | Stiebel Eltron uses only the most durable materials. The SOL 27 Premium is the culmination of over 40 years of experience in solar thermal manufacturing. The SOL 27 Premium's 10 year warranty is a testament to the confidence we have in our products.

**Installation time is minimized** | The large panel size and the availability of a full complement of custom designed mounting accessories minimize installation costs. The plumbing connection from collector to collector does not require the use of tools.

**Tax Credits and other incentives** | Please consult our website. The SOL 27 Premium is eligible for a 30% federal tax credit on the total cost of materials and labor, with no upper limit, as well as any state or local tax or rebate incentives that may apply. Federal tax credit is not available for systems that heat swimming pools or hot tubs. System must be installed in primary residence.
